**Lift-off Stretchers
Safer. Easier. Faster.**

Features

Versatile – 3-way use Here is an easy-roll gurney that can speed up patient handling, and be used for exams and treatments. Plus, it's got extra room for storage.

Ultra lightweight gurney Because this gurney weighs only 31 pounds – just a fraction of what other gurneys weigh – it rolls effortlessly on its 4 swiveling casters.

Steering handles at both ends So one or two people can steer and make tight turns in crowded spaces, narrow hallways.

Have supplies – will travel Also with this gurney supplies can travel with the patient, so whatever you need is always with you.

Larger patients The Ultra-Lite Gurney is 52 inches long and can carry patients up to 250 pounds. Heavy-duty construction – all welded.

Exam-treatment table When used with the Hard Stretcher top, the Ultra-Lite becomes a treatment table with a reinforced surface that is firm and non-slip.

Extra storage The generous storage space can hold up to 100 pounds of supplies and equipment (in addition to patient load).

MRI compatible model A non-ferrous model of the Ultra-Lite is available for use in MRI environments.

The top is a stretcher held securely on 4 posts but easily lifts off for transferring or lifting patients. This lift-off stretcher helps reduce back injury and makes moving patients safer and faster. Eliminates awkward handling of compromised patients

**2 lift-off
Stretchers
available**

Soft Stretcher Very light-weight. Plastic fabric is medical grade, anti-microbial Herculite®. Wipes clean. X-ray transparent. Strong aluminum frame. Fully welded. Feet under corners of frame provide knuckle clearance.

Hard Stretcher Converts gurney into treatment table. Molded of reinforced polymer. Non-slip surface. Wipes clean. Hard surface helps immobilize injured patients. Fluids drain to port with integrated bucket hook.
