

OLYMPIC *ADVANCED* SURGICAL TABLE™

The only surgical table that places everything you need at your fingertips
Maximum Height – Better Presentation – The New Standard in Sterility

Reduce fatigue and prevent repetitive stress injuries

Olympic's ergonomic design offers twice the height range of most tables. Lowers to an extra-short 26" and raises to an extra-tall 49", so now even the tallest doctor can operate comfortably. And micro-adjustments for better visualization have never been easier. There is even an adjustable arm rest and a built-in back table.

Everything you need is at your fingertips

The Advanced Surgical Table is as efficient as an airplane cockpit because all your instruments and equipment are mounted on Swing Arms for perfect positioning – right where you want them. Each of the 4 floating swing arms can support up to 60 pounds of equipment and supplies – including an IV Pole, Instrument Tray, Patient Monitor, Anesthesia Unit, Cautery Machine, Laptop, Limb Positioner... even the Back Table. And the tool-free design allows you to reconfigure the table in seconds to meet your changing procedural needs.

Achieve a new standard in sterility

From top to bottom, the Olympic Advanced Surgical Table has been designed to help you achieve the highest level of sterility. Here you will find Olympic's full-visibility fluid channel that does not require taking any parts to the sink, protective covers over each of the foot switches, and a swing arm system that removes all those extra stands and casters from the floor. With fewer places for debris and lavage to hide, cleanup is now quicker, easier and more thorough.

At last... A fear-free table warming solution

Olympic's Thermo-Safe™ table-top warming system provides controlled warming and a clear visual display for optimal patient comfort and thermo-regulation. Unlike other warmers that rely on a single thermostat, the Olympic warmer continuously monitors 6 thermostats on the patient surface to help assure a patient's safety and comfort at all times.

More >>>

Extra tall 49". Advanced Cleaning System. Integrated Back Table.

Cleaning has never been quicker or more efficient

All surfaces are clearly visible and easy to reach. Foot switches are shielded from splatter with protective covers. No more caster stands clustered around the table.

Advanced 6-sensor warming system

Keep patients warm and safe. No guesswork with easy, intuitive controls.

Integrated Back Table

Eliminates a clunky piece of extra equipment that is hard to clean. Height and forward position adjust automatically.

Fully customizable in seconds

Add Olympic accessories or add your favorite anesthesia unit, monitor or other ancillary equipment or supplies.

Reduce clutter

Integrated power outlet centralizes all connections in one place so there are no cords collecting dirt on the floor.

A Surgical "Cockpit" – All your instruments and equipment are mounted on swing arms for perfect positioning. You save time and work in ergonomic comfort.

Swing Arms – Articulated. Support 60 pounds each. Change left/right without tools.

Rock-solid operatory surface – The heavy-duty construction eliminates all bounce and wobble, whether you are working on the side or end of the table.

Better patient presentation – The patient's position can be adjusted instantly during procedures using large paddles that are easily located under the drapes. No knobs to loosen. No breaking the sterile field.

- Height adjustment from 26" to an extra tall 49"
- Tilt adjustment up to 30 degrees. V-positioner folds up to 45 degrees and automatically locks

Large table top surface – Full 57" length x 22" width for larger dogs.

Fully customizable – Swing arms provide up to 8 sockets so table can be quickly customized to meet needs of each procedure including any combination of IV Pole, Back Table, Instrument tray, Limb holder, Laptop or Patient Monitor, Anesthesia Unit.

Limb Holder – Drops into any of the 4 swing arms. Locks securely into place for orthopedic surgeries.

Back Table – Integrated stainless back-table drops into swing arm. Large 18" x 26" surface holds up to 25 pounds of instruments and equipment. Adjusts from table height to up to 13" above table. Moves forward from back to midpoint of table. Easily adjusts with hand control.

Pivoting Arm Rest – For added comfort and stabilization during delicate procedures. Slide along track for easy adjustment.

Adjustable Cam Cleats – 2 on each side of table.

On board power strip – Centralizes power needs in one place so there are fewer cords to work around. Cleaner. Safer. 120V/60Hz.

Thermo-Safe™ Patient Warming System – Table-top warming system assures a patient's comfort and safety at all times. Maximum temperature 95 degrees.

Hospital Grade 5" Locking casters for easy movement between procedures. Rock solid stability with casters locked.
